"KEATING'S POWDER." "KEATING'S POWDER." "KEATING'S POWDER."

This Powder, so celebrated, is utterly unrivalled in destroying BUGS, FLEAS, MOTHS,
BEETLES, and all Insects (whilst perfectly
harmless to all snimal life). All woollens and
furs should be well sprinkled with the Powder
before placing away. It is invaluable to take
to the Seaside. To avoid disappointment insist
upon having "Keating's Powder." No other
Powder is effectual.

KILLS MOTHS. BEETLES, MOSQUITOES.

Unrivalled in destroying FLEAS, BUGS, COCKROACHES, BEETLES, MOTHS in FUES, and every other species of insect. Sportsmen will find this invaluable for destroying fleas in the dogs, as also ladies for their pet dogs.

ing of ratepayers to elect two members to the Sanitary Board, the interest taken by the general publicain the sanitation of this Colony is extremely limited. There was a small attendance. none of the ratepayers present offered any advice to the candidates (if we except the few terse sentences which fell from Mr Thomas Jackson), and no advantage was taken of the exceptional circumstances under which the Colony is placed at the present moment to lay down a ratepayers' policy in regard to the important subject of sanitation. It is so easy to criticise that the wonder is no one took the opportunity of doing to, instead of leaving it to be done by the candidates themselves. We are accustomed to the incisive, corrosive speech of the learned Queen's Counsel, who has been playing so prominent a part in the suppression of the plague, and we may expect to hear weighty dissertations on the subject of sewers and housedrainage from Mr Leigh in the near future; therefore, it would have been refreshing to have had an independent statement of opinion from prominent residents on the subject of the hour instead of having to find expressions of public opinion only in the anonymous contributions that fill the columns of the newspapers. Perhaps it was because all that can be said in the way of criticism has already been said, perhaps it was because no one had any practical ideas with which to endow the people's representatives. It is easier to inveigh against insanitary conditions than to bring forward a cure. Emerson has well said that the constructive talent of the average Anglo-Saxon is dwarfed and superficial. Mr Francis and Mr Leigh, who are about as able men as could be induced to offer their services to the public, strove to fill the gap, but the absence of that current of ideas which is in the highest degree so, unimating and nourishing to the creative power deprived them of the stimulus necessary for successful election espeeches: One thing, however, both speakers were agreed upon-that the present insanitary condition of the Colony is due to the division of responsibility in public departments. Strange that both the Governor and the people's representatives on the Sanitary Board should arrive at the same conclusion upon different regsons. His Excellency endeavoured to foist the whole of the responsibility on the owners of house property and the Sanitary Board (making the scape-goat of the Sanitary Superintendent, the servant of the Board). The candidates for the ratepayers' suffrages were of opinion that the evil lay in the division of responsibility between the Sanitary officials and the officials of the P. W. D. By inference, we learn that the Sanitary Board, from which bright things were anticipated when it was brought intoexistence, has proved a failure. During the last six weeks we have had the fact brought prominently before us that the Colony is not in a wholesome. healthy, sanitary condition. We have the statement of His Excellency that the Board and its Superintendent have not done their duty (for that is the direct implication of his recent utterances), and we have the assurance of Mr Francis that the Sanitary Board, as at present constituted, can do nothing.

giving the Board its own medical FOR COAST PORTS. Waters are packed officers, its own Sanitary Surveyor and its own Superintendent, pointing out the anomalous conditions under which the officials of the Board have to obey the orders of the heads of other Dapartments in the Civil Service in preference to the Board which they are supposed to serve. Mr Francis' action in the Sanitary Board may not have been approved always by his constituents. but in one thing he has shown unswerying fidelity. That was in his insistence on the extension of greater powers to the Board. Mr Leigh now comes forward to signalise his entry into public life by advocating that not only The following is a List of Waters always | should the Board have complete control of all such matters as water. drainage and the general scavenging of the atreets and houses, but the appointment and complete control of its own officers. On the principle that those who pay the piper should be permitted to call the tune, Mr Leigh's contention is quite in accordance with modern ideas. Reconstituted if possible and recruited by members not strait to work on behalf of public interests instead of sitting as so many deadheads, the Sanitary Board might effect valuable amendment on the manitary system of the Colony. But it is too much to expect the Government to grant to the Board the appointment of its own officers, though an arrangement might be come to whereby the system of dual responsibility could be abolished, and the Board endowed with officers who should be responsible directly to it. Until that is done, Mr Francis is of opinion that the Board is uncleas for all practical purposes, and that it The Shanghai Pharmacy, 24, Nanking would be far better to revert to the old arrangement. The Sanitary Board would cease to exist and the work would be performed by the various officials, who, under the present system, alternate between being members of the Board and the nominal servents of the Board.

Mr Francis and Mr Leigh make one

proposal with the ulterior object of im-

proving the sanitation of the Colony.

Mr Francis dwelt on the necessity of

'NO ONE'S' SUGGESTION.

To the Editor of the 'CHINA MAIL.' 20th June. Sin .- Your two correspondents 'No-one and 'Somebody' are plainly twin wage of the first water, and have just as plainly been trying to hoax your numerous readers. The deadly dulness which they so vividly and not altogether inaccurately describe as The Counting House, where erstwhile the noise of acratching pens was beard from early morn till late night, whose silence was further broken by eagerly-whispered phrases in which exchange and the falling dollar predominated, and whose sanctity was only invaded by the intermittent calls of visition brokers, is now undisturbed except by the peng-peng of hordes of busy and bloodthirsty mosquitoes, and by the searcelystifled yawns of clerks who have little else to do but mix 'cock-tails' and roll innumerable eigerettes. It is now possible to get into an office without having to clamber variegated chair-coolies. Our main thoroughfares, once the only haunt of perambulating office-less brokers, are now empty and deserted; grass is already beginning to choke up ways that were formerly kept bright and shining by the feet of numerous coolies, painfully thinning : junks and sampans are not as numerous as they were a month ago. The only busy people are cracker-makers, sellers of disinfectants and doctors, and even they, at the present rate of decrease, must soon less their clients. This once busy place. the just pride of its inhabitants and a constant source of unfeigned and unrestrained admiration to the globe-trotter, will ere long the authorities, on account of the latter he more of a Sleepy Hollow than the neighbouring Portuguese settlement. THE CHINA REVIEW. PUBLISHED BI-MOLTHLY.

THIS Review, which was intended to meet L the wants of many students of Chinese caused by the discontinuance of Notes and Queries on China and Japan, has reached its Twenty-first Volume. The Review discusses Twenty-first Volume. The Review discusses those topics which are uppermost in the minds of students of the Far East and minds of the far East and minds of the far I apan is desirous of nected with China or Japan is desirous of nected with China or Japan is desirous of nected with China or Japan is desirous of Inacquiring trustworthy information. It inacquiring trustworthy information. of China, Japan, Mongolia, Tibet, and the Far East generally. Recently a new departure has been taken, and the Review new gives papers on Trade, Commerce, and Descriptive notes of Travel by well-known writers. It was thought that by extending the scope of the Review in this direction, the Magazine would be made more generally

The Review department receives special_ attention, and endeavours are made to attention, and endeavours are made to present a careful and concise record of Literature on China etc., and to give critiques embodying sketches of the Most recent works on such topics. Authors and Publishers are requested to forwar works. to 'Editor, China Review, care

The Notes and Queries are still continued and form an important means of obtaining from and diffusing among students knewledge on obscure points.

The Correspondents' column also affords farther and greater facilities for the interchange of views and discussion of various

Original contributions in Chinese, Latin, or any of the Modern Languages are received. The papers are contributed by the members of the various Consular, the Imperial Customs, and Hongkong Services, and also by the Missionary bodies amongst whom a high degree of Chinese scholarship is assiduously cultivated. Amongst the regular contributors are Drs. Chalmers, Eitel, Bretschneider, and Hirth, Professor Legge, and Messra Balfour, Watters, Stent, Phillips, MacIntyre, Groot, Jamieson, Faber, Kopsch, Parker, Playfair, Giles, Piton, and Taylor,—all well-known names, indicative of sound scholarship and thorough

mastery of their subject. The Subscription is fixed at \$6.50 per annum, postage included - payable in ad-Orders for binding volumes will be promptly attended to; Address, 'Manager, China Mail Office.'

OPINIONS OF THE PILESS. 'All our learned societies should subscribe to this scholarly and enterprising R: view.'-Northern Christian Advocate (U.S.) The China Review * * * has an excellent table of contents.'-Celestial Empire. The Publication always contains subjects China and Japan Governments. numbers.'-Celestial Empire.

The China Review for September-October fully maintains the high standard of cation, and altogether forms a very interesting and readable number. Meteorologists will find an interesting and valuable contribution by Dr. Fritsche, on "the Amount of Precipitation (Rain and Snow) of Poking," showing the results of observations made at the Imperial Russian Observatory at Peking, from 1841 to "Notes on the Dutch Occupation of Formosa," by Mr. Geo. Phillips, contains some interesting information, although much of it is second-hand. The Notices of

New Books include a most generous and appreciative review of "The Divine Classic of Nan-Hua," and the Notes and Queries are as usual very interesting.'-North-China Daily News. 'A substantial and reliable Review which all students of China and the Chinese would do well to patronise. - Ohrysanthemain. The November-December number of the China Review contains less variety than

usual, but the few articles are very interesting. The opening paper by Mr Herbert A. Giles on "The New Testament in Chinese" treats of a question that must necessarily be of great importance in the eyes of all missionaries. Mr E. H. Parker's "Short Journeys in Szechuen" are continued, and a goodly instalment of these travels in the interior of China is given. Mr F. H. Balfour contributes a paper of some length entitled "The Emperor Cheng, founder of the Chinese Empire," which will be read with genuine interest by students of Chinese history. A few short notices of New Books and a number of Notes and Queries, one of which "On Chinese Oaths in Western Borneo and Java" might appropriately have been placed under a separate heading, complete the number.'—H.K. Daily Press.

Trubner's Oriental Record contains the following notice of the China Review:-The present publication, judging by the number now before us, is intended to occupy a position, as regards China and the neighbouring countries, some what similar to that which has been filled in India by the Calcutta Review. The great degree of attention that has been bestowed of late years upon the investigation of Chinese literature, antiquities, and social developments, to say nothing of linguistic studies, has led to the accumulation of important atores of inform. ation, rendering some such channel of publicity as is now provided extremely desirable; and sontributions of much interest may fairly be looked or from the members of the foreign consular services, the Chinese Customs' corps, and the missionary body, among whom a high degree of Chinese scholarship is now assiduously cultivated, Ra and who are severally represented in the first So number of the Review by papers highly creditable to their respective authors Some translations from Chinese novels and playance marked by both accuracy and fresh - L.
